

The AI Starter Guide for Dietitians & Health Professionals

A practical guide that cuts 15 hours of repetitive weekly work
down to 2

GROWT Method

Who Is This Guide For?

This guide is for dietitians, psychologists, physiotherapists, and health coaches who lose hours writing client plans, keeping session notes, producing Instagram content, and chasing appointments. If most of your billable energy is going to repetitive admin instead of your clients, you're in the right place.

What's Inside This Guide?

- 5 AI tools — hand-picked for a health practice (Claude, ChatGPT, Calendly, Whisper, Canva AI)
 - 3 practical scenarios — client onboarding, weekly content, and post-appointment follow-up
 - 10 copy-paste prompts — from nutrition plans to Instagram posts, ready to use
 - A step-by-step checklist for your first 7 days — to start from scratch and see a real result
 - A tool comparison — which to use when, and what's free vs. paid
-

Client intake forms, session notes, Instagram content, appointment reminders — is most of your time going to these? You do the same tasks over and over, every time from scratch. AI takes that repetitive load off your plate, so you can focus on your clients.

Why AI Matters

AI adoption among health professionals picked up real momentum in 2024. Building nutrition plans, gathering pre-session information, managing client follow-up — all of it can now be done in minutes with AI. The practitioners who get ahead of this are serving more clients and growing their income at the same time.

For a health practice, the biggest opportunity is making the client experience both personalized and systematic. AI does that faster and more consistently than doing it by hand. The 15 hours a week you currently lose to repetitive work can go toward winning new clients or raising the quality of the care you already deliver.

The Numbers

63%

Share of a health professional's time spent on administrative work — bureaucracy, not clinical care.

McKinsey Global Institute, 2023

10 hrs

Average time saved per week by dietitians and health coaches who actively use AI tools.

Growtify AI User Survey, 2024

3x

Instagram engagement lift for health practices using AI — driven by systematic content production.

HubSpot Social Media Trends, 2024

WITHOUT AI

- Writing every client's plan from scratch — 1 to 2 hours each
- Instagram content thrown together in one panicked weekend session
- Appointment reminders sent by hand, and often forgotten
- Session notes that add another half hour after the practice is already closed

WITH AI

- You enter the client's details; AI drafts the plan in 10 minutes — you approve it
- A full month's content calendar ready in one session, with Canva AI generating the visuals
- A Calendly + AI message setup that sends reminders automatically
- A session-note template that AI summarizes instantly — you just add the critical details

Scenario 1: Scenario 1: A Client Onboarding System

Problem:

A new client signs on, fills out a form, gets measured — and then you're staring down hours of plan-writing. Every client is different: allergies, activity level, goals all vary. That personalization matters, but it eats your time.

Step-by-Step

- 1 Build a standard intake form for clients to fill out (Google Form or PDF)
- 2 Copy the form responses and paste them into Claude
- 3 Use your prompt template (there's an example below)
- 4 Review the nutrition-plan draft AI produces, then tailor it to how you practice
- 5 Save the shopping list and weekly meal table as a PDF
- 6 Prepare the first-week check-in message template in the same session

EXAMPLE PROMPT

You are an experienced clinical dietitian. Based on the client details below, build a 7-day nutrition plan.

Client details:

- Name: [Full name]
- Age: [Age]
- Sex: [Sex]
- Height/Weight: [Height] / [Weight]
- Goal: [Weight loss / Weight gain / Healthy eating]
- Activity level: [Sedentary / Lightly active / Active / Very active]
- Allergies/Intolerances: [List]
- Foods they dislike: [List]
- Budget: [Low / Medium / High]
- Special notes: [Add if any]

Please build a plan that includes:

1. A daily calorie target and macro split (protein/carbs/fat)
2. A 7-day meal plan (breakfast, snack, lunch, snack, dinner)
3. A weekly shopping list (organized by category)
4. 3 key nutrition rules for the first week
5. Water-intake and sleep recommendations

Use a warm, motivating tone. Note: this is a draft to be reviewed by the dietitian — not medical advice.

BEFORE

Plan-writing: 1.5-2 hrs, shopping list: 30 min — ~2.5 hrs/client total

AFTER

Data entry + review: 15-20 minutes — per client

Scenario 2: Scenario 2: A Weekly Instagram Content System

Problem:

You know you should post on Instagram consistently. But your weekdays are packed with clients, and there's no time left to create content. So on Sunday you scramble to put together 3 or 4 posts — and they rarely get past the usual motivational quote.

Step-by-Step

- 1 At the start of the month, build a 30-day content calendar with Claude (use the prompt below)
- 2 Once the calendar is approved, generate each week's visuals with Canva AI
- 3 Upload the visuals to Buffer or Meta Business Suite and schedule them
- 4 Spend 30 minutes a week preparing and scheduling that week's 5 posts
- 5 For Stories, use a talk-to-camera format — no technical setup required

EXAMPLE PROMPT

You are a social media specialist who creates content in the health space. Build a 30-day Instagram content calendar for [specialty: dietitian/psychologist/physiotherapist] for the month of October.

Target audience: [target client profile — e.g. women aged 30-45 looking to lose weight healthily]

Tone: warm, informative, motivating — sounds like a real person, not a clinic

Post mix: 40% educational posts, 30% motivation/story, 20% question/engagement, 10% promotion

For each day, give me:

- Day number and theme
- Post title (max 10 words)
- Caption copy (max 150 words)
- 10 suggested hashtags
- Visual direction (what kind of image to use)

Pick stronger-performing topics for Mondays and Fridays.

BEFORE

6 hours a week — content ideas, writing, visuals, uploading

AFTER

30 minutes a week — calendar ready, just approve and upload

Scenario 3: Scenario 3: Automated Post-Appointment Follow-Up

Problem:

The session ends, the client leaves. Until the next appointment, you have no idea how they're doing. You'd like to send a follow-up email, but there's no time. You'd like to send a motivation message, but personalizing it takes too long. The result: clients slip through the cracks and don't come back.

Step-by-Step

- 1 Right after the session, record a voice note of your session notes with Whisper (5 minutes)
- 2 Transcribe the recording (Whisper does it automatically)
- 3 Feed the transcript to Claude and use the prompt below to produce a follow-up package
- 4 Review the messages AI generates and add your personal notes
- 5 Connect it to your scheduling tool (Calendly) or send it manually via WhatsApp/email

EXAMPLE PROMPT

Below are my notes from a session I just ran. Based on them, prepare a follow-up package for the client.

Session notes: [Paste the session summary here]

Client name: [Name]

Session date: [Date]

Next appointment: [Date]

Please produce:

1. A session-summary message (for WhatsApp, warm, 3-4 sentences)
2. 3 practical tips for this week (specific to the client's situation)
3. A next-appointment reminder message (to schedule for 2 days before)
4. A motivation message (to send 3-4 days later — personal and original)
5. 2 prep questions for the next session

Write all messages in a warm, supportive, second-person tone.

BEFORE

**20-30 minutes per client —
note-taking + email + setting re-
minders**

AFTER

**5 min voice note + 10 min AI re-
view — 15 minutes total, partly
automated**

Recommended AI Tools

Claude (claude.ai)

Free

The most capable AI assistant for long-form writing, client plans, professional correspondence, and summarizing session notes.

Best for: [Nutrition plans](#), [session summaries](#), [patient communication copy](#)

ChatGPT (chatgpt.com)

Free

A general-purpose AI assistant — use it as an alternative or complement to Claude.

Best for: [Content ideas](#), [blog drafts](#), [alternative approaches](#)

Canva AI (canva.com)

Free

AI-assisted design for Instagram visuals, brochures, and infographics.

Best for: [Instagram posts](#), [practice promo visuals](#), [infographics](#)

Calendly (calendly.com)

Free

Online scheduling — clients book their own appointments and reminders go out automatically.

Best for: [Appointment automation](#), [reminder messages](#), [calendar sync](#)

Whisper (OpenAI)

Free

AI transcription that turns speech into text instantly — ideal for session notes.

Best for: [Session-note transcripts](#), [quick note-taking](#), [voice-to-content](#)

Copy-Paste Prompt Pack

1. 1. Personalized Nutrition Plan

You are an expert clinical dietitian. Build a detailed 7-day nutrition plan from the details below:

- Age/sex: [info]
- Height/weight: [info]
- Goal: [goal]
- Activity: [level]
- Allergies/intolerances: [list]
- Budget: [low/medium/high]

Output: daily calories + macros, a 7-day meal plan, a weekly shopping list, 3 core rules. Warm tone. A draft to be reviewed by the dietitian — not medical advice.

Expected output: A daily calorie table, a 7-day meal plan, and a shopping list organized by category

2. 2. Patient Intake Form Design

Build a thorough but concise client intake form for [your specialty]. It should cover: personal details, health history, lifestyle questions, and goals and expectations. Max 15 questions, a mix of multiple-choice and short-answer. Format it for Google Forms.

Expected output: A structured 15-question client form, ready to import into Google Forms

3. 3. Post-Session Follow-Up Message

I had a session today with [Name]. Topic: [topic]. Recommendations: [recommendations]. Based on this, write a warm, supportive WhatsApp follow-up message. 4-5 sentences, personal and friendly. Appointment info: [date/time].

Expected output: A personal follow-up message, ready for WhatsApp

4. 4. Instagram Post Copy

Write an Instagram post about [topic]. Target audience: [target audience]. Tone: informative but warm, made for social media. Caption: a scroll-stopping opening line + 3-4 bullet points of info + a CTA + 10 hashtags. Max 150-word caption.

Expected output: A ready Instagram caption and hashtag list

5. 5. Blog Intro / Hook

Write a 200-word intro paragraph for a blog post about [topic]. Reader profile: [profile]. Goal of the post: to inform and draw clients to my practice. Open with a question, spark curiosity, and hint that a solution exists without giving it away.

Expected output: An SEO-friendly blog intro with a hook that keeps the reader scrolling

6. 6. Session Note Summary

Turn the raw session note below into a professional session-summary format. Note: [raw notes]. The output should include: the main topics discussed, the issues the client raised, the recommendations given, and goals for the next session. Short and structured.

Expected output: A structured session note, in a format suitable for clinical records

7. 7. Client Appointment Reminder Email

Write an appointment-reminder email for [Name] for tomorrow at [time]. My practice: [practice name]. Address/location: [address]. Online/in-person: [info]. Tone: professional but warm. Add one prep tip (this session's topic: [topic]).

Expected output: A ready-to-send appointment reminder email

8. 8. Weekly Progress Report

Prepare a weekly progress report for client [Name]. This week's goals: [goals]. What actually happened: [results]. Variables: [note any]. Keep it short (1 page), balanced between positive and realistic, and written to keep motivation high.

Expected output: A weekly progress summary you can share with the client

9. 9. Social Media Bio

Write my Instagram bio as a [specialty]. Who I am: [info]. Who I help: [target audience]. What I do: [services]. There's a booking link. Max 150 characters, strong and specific to the field, emojis allowed.

Expected output: An attention-grabbing bio you can paste straight into your Instagram profile

10. 10. Motivation Message Series

My client [Name] is working on [goal]. What they're struggling with this week: [issue]. Write 3 separate motivation messages to send this week (Tuesday/Thursday/Saturday). Each 2-3 sentences, warm, personal, and specific. Not a generic quote — make it actually speak to their situation.

Expected output: 3 separate motivation messages, timed for different days

Your First 7 Days

One step a day. By the end of the week, you'll have seen your first results.

- ☐ Day 1: Sign up for Claude.ai (free). Build your first client intake form with AI — use Prompt 2 above.
- ☐ Day 2: Using details from your last 3 clients, generate nutrition-plan drafts with Prompt 1. Compare the outputs and add your own touches.
- ☐ Day 3: Open a Calendly account and create your booking page. Set up the auto-confirmation and reminder emails.
- ☐ Day 4: Sign up for Canva. Review your Instagram profile, define 5 post concepts. Generate 2 visuals for this week with Canva AI.
- ☐ Day 5: Use Prompt 4 to write 3 Instagram post captions. Pair them with visuals. Upload to Buffer or Meta Business Suite and schedule.
- ☐ Day 6: After a session today, use Prompt 3 and Prompt 8. Send the follow-up message to the client.
- ☐ Day 7: Review your AI use this week. Which tasks got faster? Which prompts helped most? Plan next week's 30-day content calendar with Claude.

Transform with the GROWT Method

This guide is the first step of the GROWT Method — the G stage (Gözlem / Observe). You spot your current processes and see where AI will make the fastest difference. With the GROWT Method, the next steps get far more systematic: building the AI infrastructure specific to your field (Roadmap), learning the right tools (Learn), implementing full automation (Apply), and tracking results to optimize (Track). What you've seen here is just the beginning — build your personal plan for the full transformation.

- G** — Gap Analysis
- R** — Roadmap
- O** — Operationalize
- W** — Win
- T** — Transform

This guide gave you a starting point. With the GROWT Method's structured process, complete the full transformation across 5 levels.
